

Advancing Analytics Limited

First Floor, Telecom House,
125-135 Preston Road,
Brighton,
East Sussex,
BN1 6AF

This statement is made by Advancing Analytics. It sets out how we, during the financial year ending 31 October 2020, continued our efforts to reduce our Carbon Footprint.

Our business

Advancing Analytics is an IT Consultancy. We are a purpose driven organisations and environmental sustainability is at the core of our company's values. Since the start of Advancing Analytics in 2018, we have remained committed to ensuring that our business is sustainable. Our aim is to remain business carbon natural. We continue to ensure our compliance through our Environmental Action Plan.

Environmental Action Plan

We are committed to the following activities to help us achieve our environmental and sustainability goals:

- **No Physical Premises** – As a small team we do not need a physical office with the waste & consumption this entails. We will continue to promote virtual working as we grow, using shared, on-demand workspaces should physical meeting be necessary
- **Virtual over Travel** – Whilst we are happy to travel to meet our clients, modern digital collaboration is reaching new levels of sophistication. Where possible we promote a “virtual-first” working relationship with our clients
- **Paperless Office** – All work is performed digitally, with paper contracts and printing as an absolute last resort should it be demanded by a client. We will ensure all employees are sufficiently equipped to make this a feasible, sustainable goal.
- **Carbon Neutral 2020** – For the travelling and work that is unavoidable, we are committed as a company to offsetting this and achieving Carbon Neutral status in 2020
- **Environmental Training** – All staff will be trained to ensure they are following best practice for energy conservation, purchasing from sustainable/renewable energy sources, following waste management best practices and using public transport where digital communication is not possible.
- **Environmental Officer** – In order to ensure this policy is being followed and we are activity working towards a more sustainable environment, Advancing Analytics will nominate an Environmental Officer, responsible for producing a yearly statement and reporting on the adherence to this action plan.

Further steps

We are committed to continuing our focus on environmental sustainability and will take steps to review and, where appropriate, further improve our processes to ensure that we mitigate the impact of our carbon footprint.

Approval

The statement has been reviewed and approved by Advancing Analytics' Board of Directors, which applies to Advancing Analytics for the financial year ending 31 October 2020.
